Damn, another 20 missed calls  
I love her and I hate her, it's a funny twist ya'll  
Can't stand her when she in town, but miss her when  
she gone  
Truth be told, I'd rather be with her than alone.  
But fights break out, and neighbors call 5-0  
Screamin you the most foul b\*tch I know.  
Forever mine, wherever I go.  
Sex pistols out....die slow.  
Nah, die slower than that  
Just collapse all over my mattress  
Who shot ya? That n\*gga ain't finished  
So once again I find myself in it...click clack.  
Just lemme take a minute  
Round two is in the chamber, all you gotta do is spin it  
Aim for the heart, battle of the sexes  
All's fair in love and war, casualties expected.

I never had it so good before  
It's never been like this (Like this, this, this)  
I swear I always want more (More)  
Feel like I need rehabilitation  
I'm sure imma overdose.

So close to the edge  
And I don't think that I can back away (I'm in trouble)  
I might just jump over the ledge  
Cause I'm up too high  
Feels like I can fly

I think I'm addicted  
So you can call me a fiend  
Give me something quickly  
And get the monkey off me  
(X2)

Got me ditchin responsibility  
So I can find you (Where?)  
Clearly lately I'm really fiending  
Cause what you got is what I'm needing yea  
Need you to let it run through my veins.

So close to the edge  
And I don't think that I can back away  
I might just jump over the ledge  
Cause I'm up too high  
Feels like I can fly

I think I'm addicted  
So you can call me a fiend  
Give me something quickly  
And get the monkey off me  
(X2)

Gimme all of you  
Anoint me with your touch  
When I want it don't say no,  
Give it to me, lemme overdose  
(x2)

So you can call me a fiend  
Give me something quickly  
And get the monkey off me

I think I'm addicted  
So you can call me a fiend  
Give me something quickly  
And get the monkey off me

Gimme all of you  
Anoint me with your touch  
When I want it don't say no,  
Give it to me, lemme overdose  
(x2)

Overdose, overdose, overdose, overdose, overdose.
