I hope (I hope) she lights that candle I hope (I hope) she  
shows me everything and all that light can bring Like a  
mad temple crowd Her skin (her skin), it begs my  
worship I crush her, she goes down We melt up from  
the ground? Up to better times, sweet release, take me  
now, take me now, yeah Up to better times, sweet  
release, take me now, take me now You're a cloud, just  
a blemish on the sun Doubt (doubt), get right behind  
me And there's better times to come Our love, this  
cloak and dagger This silent will to brighten everything  
And find the road that leads? Up to better times, sweet  
release, take me now, take me now Become the dove,  
just fly away? oh Up to better times, sweet release,  
take me now, take me now, yeah, Oh, and if we die  
tonight, take our leave from this plastic place Come on  
baby up to your better times Up to better times, sweet  
release, take me now, take me now Your sweet release,  
take me now, take me now, oh Oohh oooh Oh.
