From Napster to Rapstation.com

T the Internet's equivalent to a dropped bomb upon the distribution industry

It fits the fusion, feel the synergy

With MP3 Music Communities; not even meters can limit me

There's no boundaries with this, The means finally exist

Cause there's no ceasing to the sounds that people get

And I resoundingly admit, I dress a track like

vinaigrette

They're wishing they could go back to when Napster wasn't invented yet

[PackFM]

Well, let me interject with intellect, catch me on the Internet

On or off-line, a floppy disk or cassette

I'll address the rap nation, napster to rapstation

The industry's full of dicks, I cut em off like castration

They're catching hissyfits, in actuality it's flattery

I searched napster to download this...now you cats are mad at me?

For you a hard drive is a ride without a chauffeur

But it holds all your tracks for your fans in Manitoba

"Where the fuck is Manitoba?"

Don't you know that little town in West Bumblefuck

where the net is your

only form of exposure?

This shit is far from over, damn right I'm a downloader

You should change your names to story, cause yo, I thought I told ya.

[Tonedeff]

Tommy Mottola makes a million a minute, if you see him

Start grilling him in his BM for stealing our listening freedom

He's disagreeing with Napster - acts to block it

But notice, the only artists complaining seem have the fattest pockets

It's sad and shocking, the way that greed controls  
nation  
If a track is lent to me, it's not a legal violation  
My summation's they build an absurd case  
Cause to make an MP3 of a track I need the CD in the  
first place

[PackFM]

I don't care who you are, I'll battle ya, from Dre to  
Metallica  
Your shit got leaked, cause I got an email from a pal of  
yours  
Shit, I ain't mad at ya. I shine like an Arista  
MP3's the biggest thing since a pokemon character  
So, I log onto Napster to take a Peek-At-Choo  
This is a sneak preview, passed on from me to you  
From PCs to G3's it's the sound of the streets  
Rapstation & Napster, Power to People and Beats.
