### "Stay Away From Me"

I call your name  
I saw your face  
You didn't turn around  
I never heard it  
You're taking the lead  
In my self destruction  
When you call my name  
I never heard it

I waste away my time  
I take another line  
In my poor sorry mind  
I think of what I took from you  
But you can't stay away from me

OOHHHH what I need is you  
But I just can't stand it  
OOHHH who I need is you  
I can't face the fact that you know me

I call your name  
I saw you face  
Telling me to stay  
I never heard it  
I can't help thinking  
That everyone 'round me  
Can't hear what I say  
They never heard it
