"Breathe"

Visit "[Breathe](#)" on MotoLyrics.com

let it fall
whether it's short or tall
let it hide
whether the ocean is wild or tide
let it rest
whether it's your best
let it go
whether you don't or know
the sun shines bright
and light is coming tonight
as the clouds pass by

oh i know you've been tired
when your lungs fired
so high
oh i know you want me to go
but there's more to say
you gotta breathe anyway
breathe now anyway

when the sky touch the ground
it's gonna be me that you can found
i know it's been passing through
but it's still on to you
hold your air still so do
you want to feel
i know that it's been jaded
when it's life frustrated
don't worry now
you'll be alive somehow

oh i know you've been tired
when your lungs fired
so high
oh i know you want me to go
but there's more to say
you gotta breathe anyway
oh i know you've been tired
when your lungs fired
so high
oh i know you want me to go

but there's more to say
you gotta breathe anyway
breathe now anyway

feel
it's this way too real
touch
i know this is too much
hear
you know that i am near
sight
the sun shines bright tonight

(guitar solo)

oh i know you've been tired
when your lungs fired
so high
oh i know you want me to go
but there's more to say
you gotta breathe anyway
breathe now anyway
oh i know you've been tired
when your lungs fired
so high
oh i know you want me to go
but there's more to say
you gotta breathe anyway
breathe now anyway
oh i know you've been tired
when your lungs fired
so high
oh i know you want me to go
but there's more to say
you gotta breathe anyway
breathe now anyway

So breathe now anyway
