"Free"

Today's the day I always knew would come today I
gave my liberty
I'll miss that prison you release me from the ties are
gone at last I'm free
Free to choose the times and places where I cry
Find new peace of mind at least I'm free to try
Oh I'm free to live in misery your love is gone and now
I'm free
[fiddle]
I'm free to go where tear filled laughter flows where
wine parades a happiness
The kind of place I've never cared to go there's where
I'll be I'm free at last
Free to choose the times...
