Navigate your life plan
And radiate with all you have
Lie down in your head
Let loose your life thread

Let it slip right out of hand
Let it slip right
Let it slip right out of hand
Let it slip right

And she knew her timeline
And she tugged on her life vine
And her soft mind spoke it's prose
And her words clench as she floats

And she slipped right out of hand
And she slipped right
She slipped right out of hand
She slipped right
