Feed the light  
I want to fight about it now  
You won't be lost  
You won't be found  
You won't be lost  
You won't be called out by me for sure

I love you  
But you still believe  
That blossoms understand when hit  
With cold hard wind  
It's not the end  
Just changing climate for sure

Be sure to feed the light  
Just feel the right to get it wrong  
It's not the end, it never ends  
You won't be lost  
You won't be found  
Unless you want to be found
