No other arms, no other lips  
No other love but you

We've had our stormy weather  
We've had our sunshine too  
We've shared them both together  
And I'm still here with you

Sometimes I made you happy  
Sometimes I made you blue  
But love kept us together  
And I'm still here with you

No other arms, no other lips  
No other love beside me  
No other star of love  
Above to guide me

Someday you'll go to Heaven  
As all good angels do  
I'll find my way to Heaven  
So I'll be there with you

No other arms, no other lips  
No other love but you
