Hearts of stone, skull and crossbones  
We band together  
The sound of steel, a noise you can feel  
The smell of leather

Suspended thighs, blackened cat eyes  
We love to shout  
The power's in the crowd  
Cause we all, we all, love it loud  
The power's in the crowd - we love it loud

We all need - american metal  
Through in through - american metal  
You've got to bleed - american metal  
Red, white and blue - american metal

Hear the thunder, rumbling under  
It cracks the sky  
My the dust never settle  
Heavy metal, will never die

Salute the flag and raise up your fist  
And scream it out  
The power's in the crowd  
Cause we all - we all  
Love it loud - the power's in the crowd - we love it loud

We all need - american metal  
Through in through - american metal  
You've got to bleed - american metal  
Red, white and blue - american metal

We all need - american metal  
Through in through - american metal  
You've got to bleed - american metal  
Red, white and blue - american metal
