Time for revolution  
Time to strike them down  
Denying evolution  
Was their last mistake

Many of us has had it  
With all their fake ideals  
Risky superstition  
The hazardous belief

The nation stands divided  
So hard to understand  
Science flabbergasted  
It's so retarded

Intellectuals baffled  
How low can you go  
When all the proof points elsewhere  
Idiots persist

Divinity, dividing nations  
Congretations, holy wars  
They are on in their delusions  
Sacred structure, in their minds

Darwin had the answer  
Many years ago  
Scientific explanation  
To many mysteries

Capitalistic sermon  
A hollywood belief  
Money over wisdom  
On wall street they kneel

So naive, unenlightened  
You should be frightened of them all
