"Stars Above You"

Visit "[Stars Above You](#)" on MotoLyrics.com

Tonight's the night, we're gonna make the stars alive.
We were never meant to be but you and me can make it
alright (alright)
Cause I especially love you when the stars are above
you (stars above you)
Said I especially love you when the stars are above
you...

When the stars are above you (x5)

I lay you down, down, down, down by the tabletop
I lay you down, down, down, down by the tabletop
And I'm not going anywhere
I'm not going anywhere (x3)
And even if the sun burns out and the stars fall down
I'll be standing there waiting for you.
And when the sky just can't get any higher,
I'll be laying there saying to you.
That I especially love you when the stars above you
I especially love you when the stars are above you (x2)
I especially love you...

When the stars are above you (x9)

Shooting stars let me know who you are (who you are)
Shooting stars let me know who you are (who you are)
Cause I feel like I know you feel like I know you
Shouldn't I shouldn't I?
Cause I feel like I know you feel like I know you
Shouldn't I shouldn't I?

Cause I especially love you when the stars are above
you
I especially love you when the stars are above you (x2)
I especially love you... (you you you you you)

When the stars are above you (x9)

Starts above...
