Get up in the morning, im yawning,  
Alarm clock woke me up  
im hittin on the snooze and  
im drooling  
dj won\\'t shut up  
he said he got a banger, a hot song  
sound like the last one  
i might as well listen and pay attention  
and thought that i should mention  
how, what who made that?  
it sounds like the same ten songs played back  
maybe its my imagination  
turn to the next station

what happened to creativity where\\'d it go  
its time for a rude awakening let \\'em know

Turn my guitar up and my radio down  
the industry needs change and i\\'ma come now  
these so called artists all sound the same  
and real music never get no play  
everybody want three minutes of fame  
one hit wonders are getting lame  
this is what makes me feel like  
i was born to keep the music alive

A instrumental from swizz beats  
a couple bars from weezy  
and diddy gotta say somthin\\'  
its bad boy baby  
if your formula work oh so well  
how come y\\'all cds never sell  
phony a&r\\'s in the industry  
then you blame it on the economy  
all i\\'m saying is that music is my inspiration  
but if its misused and abused then i m ust speak for my  
generation

what happened to creativity where\\'d it go  
its time for a rude awakening let \\'em know  
Turn my guitar up and my radio down  
the industry needs change and i\\'ma come now

these so called artists all sound the same

and real music never get no play  
everybody want three minutes of fame  
one hit wonders are getting lame  
this is what makes me feel like  
i was born to keep the music alive

no more robot singin  
no more chicks to make us listen  
dropping bombs don\\\'t make it hot  
mister dj you need to stop

i was born to keep the music alive  
i was born to keep the music alive  
i was born to keep the music alive  
i was born to keep the music alive

everybody thats down for the cause pick up your phone  
and call  
every radio station and tell them to put something  
different on  
i just don\\\'t think its fair  
how bs gets on the air ohh ohh  
i was born to keep the music alive

Turn my guitar up and my radio down  
the industry needs change and i\\\'ma come now  
these so called artists all sound the same  
and real music never get no play  
everybody want three minutes of fame  
one hit wonders are getting lame  
this is what makes me feel like  
i was born to keep the music alive  
i was born to keep the music alive.....
