Yo this can be our little secret  
I'm good guy so you know that I can keep it  
Started like that so it wont stop now  
We gotta stay quiet but you love being loud  
Twos crowd and we made it this far  
And nobody could even guess how close we are  
The pleasures all mine, and so are you  
It doesn't matter if the whole world doesn't know too  
Low profile, neither one of us is speakin  
Sneakin kisses, but the sex is for for the weekend  
We roll around town, with the puzzle all pieced in  
Tinted windows couple so the world can't see in,  
No rearview cuz the past is done with  
And some subs that can bump just as loud as our love  
hits  
Sit and kick it with her, get to no her so well  
That I wouldn't have to speak, and I still could tell  
That she'd listen  
If I had somethin to say,  
Made my decision  
And told her that she needed to stay  
And even though we had to keep it all tucked away  
I know that inside of ourselves we had the guts to say

Let this be our little secret, no one needs to know our  
feeling  
Higher and higher and higher, higher and higher and  
higher  
Well I feel alive and I feel it in me, up and up we keep  
on climbing  
Higher and higher and higher, higher and higher and  
higher

Take it or leave it, but I choose to believe it  
That my little city secret is my single deepest weakness  
How I really feel I wanna tell her the truth  
That she makes my heart beat way faster than it's  
sposed to  
And it's probly not good for our health  
But my sneaky little sweaty says she loves to be stealth  
Put our lips together and put our stress on the shelf

She's the reason that I let life take care of itself  
Turnin cliches into her own unique way  
Of makin sure I know were gunna be okay  
Only eyes are ours she makes the present the future  
And keep her close to my guard, so the world can't fool  
her  
You guys can keep the rain I'll take the sunshine  
She got courage to grow so were feelin alright  
Yeah, nobody needs to know  
Cuz when the last call comes and the bars all close  
The passion pit opens up, and the music flows  
Turn off the lights cuz we love the dark  
We up all night just like the stars  
And since the day is gone were gunna play this song

Let this be our little secret, no one needs to know our  
feeling  
Higher and higher and higher, higher and higher and  
higher  
Well I feel alive and I feel it in me, up and up we keep  
on climbing  
Higher and higher and higher, higher and higher and  
higher
