Were acting like a pair of strangers
Afraid of what to say
Just through away your inhibitions
Cast your doubt away
Stop holding back from sayin' exactly
What it is you need
I can take away your hunger
Satisfy your greed
Oh..
Hold on tight
Let's do what we do
Here all night
Come with me
And get close to my heart
Wanna feel you nice and warm
Locked inside of my arms
Got me ridin' like the waves
On the eye of the storm
Come with me
Come with me
And get close to my heart
Love to feel you everytime we're together as one
Only you can know the way that you move me so strong
Come with me
The walls feels like their fallin' in and
There is no escape
But I feel safe and sound here with you
A shelter from the rain
Oh, hold on tight..
Come with me...
Deep inside me
I feel that we
Both connecting now
Come with me...
