Party party party...
When you're feeling down
And you're in some kind of trouble
You just ca?? me on the phone
And i'll be there on the double
Everyone needs someone close
in their lives to hear a problem
Who will try to undestand
From the thop until the botton

So if that's what you're looking for
You don't have to look more
If you want me to be down
I will always be around
If you feel split in two
You know what you have to do
'Cause i will always be your friend
From the beginning till the end

Always got your back when you're falling
Call me up in the night or in the morning
You know i will be here forever
There's no doubt that we'll always be togheter

You can tell me straight
What you feel and what you're thinking
Don't hide your emotions
In food or in drinking
Even though the skies may seen pretty grim
The weater's changing
Why don't you talk
'Cause i hear what you're saying

So if that's what you're looking for
You don't have to look more
If you want me to be down
I will always be around
If you feel split in two
You know what you have to do
'Cause i will always be your friend
From the beginning till the end

Always got your back when you're falling
Call me up in the night or in the morning
You know i will be here forever
There's no doubt that we'll always be together

Always got your back
Always got your back
Always got your back when you're falling
Call me up in the night or in the morning
You know i will be here forever
There's no doubt that we always be together

Always got your back when you're falling
Call me up in the night or in the morning
You know i will be here forever
There's no doubt that we'll always be together

It's crazy
