girl hope your clothes are back in the closet
when i wake up
really hope the rover is parked in the garage
when i wake up
hope you're cooking breakfast in your thong
when i wake up
cos if you ain't,
ain't no need to wake up (no)
if i ain't sleeping next to you (you)
i dunno what your boy gone do (do)
girl ain't noway we can be through (through)
it's getting hard for me to breathe
all i want is you and me to be

back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were
do you remember the time when we fell in love (lets go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were
do you remember the time when we fell in love

ey baby
if i would of known back then what i know now
lady, would've came home every time you said needed
me around
oh baby
instead of running round in them streets
girl i swear i wish i would of known (known)
if i ain't sleeping next to you (you)
i don't know what your boy gone do (do)
girl ain't noway we can be through (through)
it's getting hard for me to breathe
all i want is you and me to be

back to the way, back to the way
back to the way we were (can we go back)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were
do you remember the time when we fell in love (lets go)
back to the way, back to the way
back to the way we were (i wanna go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were
do you remember the time when we fell in love

girl i'm just trying to be the man that you fell in love
with
walking around (?) holding hand
(?) at night cuddled up with
i really miss that girl that didn't have a problem with my
career
if i could do magic i'd snap my fingers make love re-
appear
i really want us back baby
said i really miss my baby
now i know what i gotta do to make this me and you
lets go..

back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were
do you remember the time when we fell in love (lets go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were (lets go)
back to the way, back to the way
back to the way we were
do you remember the time when we fell in love
