Don't condemn a woman by the places she go and stay.
Don't condemn the woman by the places she go and stay.
Because some no good man has made that poor girl that way.

Don't brand a woman by what the public says.
Don't brand a woman, if she needs help, don't drive 'er away.
'Cause it may be your brother that caused 'er to be that way.

Some men always sayin' that every woman is just the same.
Some men always sayin' every woman is just the same
But don't say that because there is two sides to everything.

There's some men could make a woman such a happy life.
There's some men could make a woman such a happy life.
But instead of being a man with home she's been 'round both day and night.

After all she's only a woman; be careful to the things you say.
After all she's still a woman; be careful to the things you say.
'Cause it may be your mother or your sister will be in her fix someday.
