Sleep now, but remember to wake up.
Up, wake up, wake up and remember.
Live clean and breathe free.
The day is just a time to sleep with the lights on.

Ringin', the door is opening.
The kite just spreads it's wings and surrounds us.

Just dream and let me,
Let me guide you through to the other hillside.

Come on, get a grip and close your eyes with me.
A story's not a story 'til you've made it up, you see?

You can't start changing minds until you've changed
your own.

So c'mon and change with me.
