Your secret is safe with me, understand what I feel  
The hunger - the deep need  
The thirst - when you bleed  
I know tonight is the night, to explore your darker side  
When you want me to be your sire  
I'll give you what you desire

Willows weep into the night, I sacrificed the daily light  
The passion - immortality  
The force - irresistibly  
The kiss that brings eternal life, tonight the lonely strife  
Your world will never be the same  
Without my poison in your veins

You gotta kiss me now  
I wanna feed you now  
You gotta kiss me now  
I wanna feed you now

I welcome death without tears, embrace darkness  
without fears  
My fangs - deep into your skin  
My eyes - the evil grin  
A symphony of pain by night  
A newborn child is taking flight  
You just don't know how sweet it is  
To die from a vampire's kiss

You gotta kiss me now  
I wanna feed you now  
You gotta kiss me now  
I wanna feed you now
