(Don Wayne - J. Marshall)

It's dy-no-mite where you love me I've got the fire that  
burns to prove just that

Yes it's dy-no-mite where you love me you lit my fuse  
and blew me off and out

I thought that I was cool calm and elected welcome to  
the club I thought so too

But I got more charge from you that I expected

Ain't we glad the combination works so good

It's dy-no-mite where you love me...

[ steel ]

I thought it jingles each time you come near me I get all  
shook up every time we touch

It's gettin' harder every time you left me you know a  
man can only stand so much

It's dy-no-mite where you love me...

It's dy-no-mite where you love me...
