(Conway Twitty)

I'm so used to loving you sweetheart you're on my
mind each minute we're apart

And I love you more each day that we go through
You're my life and I'll live it loving you

I'm so used to loving you it seems

I can't stand the thought of losing you not even in my
dream

Hold me close and tell me what I'd do without you

I couldn't take it I'm so used to loving you

[steel guitar]

I'm so used to the little things you say like hello darlin'

did you have a busy day

And the way you hold me close when day is through

Yes you're my love and I'll love it loving you

I'm so used to loving you...
