(Frances Rhodes - JJames Perry Pulliam)

You say I shouldn't be here it's the same thing every
night

You say I should go home to her what we're doing just
ain't right

It's true she's there waitin' and wonderin' there's no
doubt

But she's the one you live with and you're the one I
can't live without

She's the one you live with but you're the one I can't live
without

And she's the one you dream with but you're the one I
dream about

They say I'm breaking up your home it's not a home it's
just a house

She's still the one you live with but you're the one I can't
live without

[steel]

If I knew you only lived there and your love for me was
true

But how can I be certain you're not makin' me a fool

Suerly you must kissin' who keep proof from findin' out

But she's the one you live with but you're the one I can't
live without

She's the one you live with...
