I don't take it lightly
The way you look at me
The life we're living here
It's hard to take for granted
This gold light
These cool nights
It's kind of fall again
This is our time
You can't be waiting for the perfect time
For something magical to change the scene
And fall into a perfect time
Anyday, anyday, anyday, anyday, anyday
Anyday now ...
Used to live for someday
And thinking of the pain
Often distracted me
from living the life at hand
Days were common as rain
Rain was common as love
Love was only a pain
To be falling in and out of
Was always waiting for some kind of sign

For something magical to change the scene
To spell it out and say it's time
Anyday, anyday, anyday, anyday
Anyday now ...
Some things haven't quite worked
And some things never quite will
Sometimes I think I lack the necessary
Grace and skill
But it was fun riding in that car
I've never laughed so hard
And these things mean more and more
This is our life
You can't be waiting for anything
And what's more magical than loving you
I'd choose it anyday
Anyday, anyday, anyday, anyday, anyday ...
Anyday now ...
