It's easy when you smile  
We can talk a while  
Just lie here in my arms  
Safe and warm  
Outside the night is so unclear  
Stay here  
And everything will disappear

It's easy when you laugh  
Troubles cut in half  
Where I will go without you?  
I don't know  
Outside the night is breezing by  
Don't cry  
And everything will be alright

Hold me, hold me, stay  
Tomorrow's far a way  
And so are we  
And that's why it's easy  
It's easy when you say  
We can find a way  
Don't worry about it now  
We'll get through it some how  
Outside the night is almost gone  
Stay strong  
And maybe we can still go on

Hold me, hold me, stay  
Tomorrow's far away  
And so are we

It's easy when you smile  
We can talk a while  
Just lie here in my arms  
Safe and warm  
Oh... oh easy  
It's so easy when you smile
