Ughhhh, Los, uh-huhhh
Baby girl what's this about
Invite me in and kick me out
There's better ways to deal with this
Does it offend you that I'm real as sh*t
Ain't another dude as tough you feel me
I mean who love you like I love you really
What's up with this distancing
I don't feel significant
Hold up wait girl hold just a min
I need this moment just to vent incidents I can't control
Came up out I had to go
You knew I was coming back, you wanted that I had to
grow
Said you could get past my past, so what we movin'
backwards for
Who knew it would take this long, you never mentioned
that before
How could you diss me this me, kiss me dismiss me
just leave
B*tch we history, mystery haunts me how you smile
don't miss me
Want me need me call me beep me,
Heal me hear me touch me see me feel me
See she guilty look away, crooked love can't look my
way
Took a day to write you this, for night you miss in light
of this
Cuz I made it despite of this, let's make a night of this
Fire lit glass of wine relax your mind we passin' time
Ashes from the passions of our passes fly and it's fine
Damn it's time to accept it I never hear your voice again
It's so hard to say goodbye but that's what turns boys
to men
The choices in life never seem fair
But they bring light to the things never seen there
So at least for the time that it took
When you climb and you look
You dun made it to the clean air
Breathe in enjoy it cuz sum seek joy just to destroy it
Distorted visions don't playback the way they were

recorded
Why can't sometimes life be edited minus all the
bullsh*t
Get a full grip fast forward through the open road
When life push your buttons you don't seem to have
remote control
I hope that your soul is safe
I hope all your goals in place
I hope that it goes the way and everything just goes
your way
I hope when foes appose you they get stuck with the
frozen face
I hope I can motivate somebody to grow today
I hope that you go hard and even though things don't
go your way
Hold up wait

Even though you broke my heart
I'm still wishing you the best
I'm just gonna play my part
If someone's willin' to invest
This has been my blood
This has been my tears
This has been a pain I felt inside my heart for years
I been workin' so hard I know they gotta feel the bars
This ain't 'bout no girl this bout the deal I lost

Yeaaa, eh yo check this out
I like to dedicate this song to,
All my failures in life
Everything that I ever endured that just made me
stronger,
It made me realize that,
It's not the end, it's not where it stops,
Anybody could do it, let's go
