### "In love with you"

I didn't want to get into this  
I was just hoping to have a good time  
What can I do I'm in love with you, tonight

With just one touch and played all my keys  
You shoot me off like a roller coaster  
What can I do I'm in love with you, Tonight

Now you're the only one I need  
To be by my side  
I know you're the one for me  
Tonight , tonight

Now every minute I need your kiss  
You got me feeling like a little child  
What can I do I'm in love with you, tonight

Maybe tomorrow will never be  
Maybe this moment can last a lifetime,  
Whatever happens its all fine by me  
Cause I'm in love with you cant you see  
I really figure you're the one for me, tonight.

Now you're the only one I need to be by my side  
I know, you're the only one I need  
To be by my side  
I know you're the one for me  
Tonight , tonight
