If you gonna be a superstar  
You gonna have to check out the stars

If you thought that I was leaving here  
Can I find a way inside?  
Try to call it just an absence of faith  
But I feel justified

You can't stare through this  
There's nothing left in my heart  
But for now, just too long  
There's no end in sight

What am I for to be hurt more?  
I just don't like you in yourself  
I can't like you, want to burn you  
I wish you were dead

'Cause if it's hard you want out it's no fun  
Got left with everything  
Behind your smile forget  
That I was left with everything

Never the same to me  
Never the same to me  
Never the same to me  
Never the same, it's never the same

Once you played up to the end  
Stop the noise  
Get nowhere with your current  
State of mind

I even wonder why you're here  
Please stay at home  
Killing my laughter, hurting my insides  
You're our plague

What am I for to be hurt more?  
I just don't like you in yourself  
I can't like you, want to burn you  
I wish you were dead

'Cause if it's hard you want out it's no fun  
Got left with everything  
Behind your smile forget  
That I was left with everything

Never the same to me  
Never the same to me  
Never the same to me  
Never the same

If you thought that I was leaving here  
Can I find a way inside?  
Try to call it just an absence of faith  
But I feel justified

'Cause if it's hard you want out it's no fun  
Got left with everything  
Behind your smile forget  
That I was left with everything

Never the same to me  
Never the same to me  
Never the same to me  
Never the same

It's how I feel, yeah, it's how I'm made, yeah  
It's how I feel, yeah, it's how I'm made, yeah  
It's how I'm made, how I feel
