Yeah, ooh

So can you feel your heartbeat racing?  
Can you feel the tension rise?  
Can you see the road you're walking?  
Are these signs too hard to recognize?

Part of where you're going  
Is knowing where you're coming from  
The hardest part of moving forward  
Are these times when we all stand alone

No, no but you'll never believe, no no

For all these times  
(For all these times)  
That we walked away  
For all these times  
(For all these times)  
That I've heard you say

Give me something to believe in  
Give me someone to believe in  
For all these times  
(For all these times)  
And it starts today

A generation always waiting  
A revolution passed this time  
Another reason to take stock  
Of all these things that you have left behind

Feelings that will never leave you  
And never make you change your mind  
You gotta make it out past this one  
Always the wrong place at the wrong time

No, no but you'll never believe, no, no

For all these times  
(For all these times)  
That we walked away

For all these times  
(For all these times)  
That I've heard you say

Give me something to believe in  
Give me someone to believe in  
For all these times  
(For all these times)  
And it starts today

Oh, Lipgloss Lies, doin' the time  
Never gonna miss what I left behind  
If I get the chance I'll do it again  
I wouldn't change it, change it  
Change it, change it

Lipgloss Lies, doin' the time  
Never gonna miss what I left behind  
If I get the chance I'll do it again  
I wouldn't change it, change it  
Change it, change it

No, no but you'll never believe  
No, no but you'll never believe

For all these times  
That we walked away  
For all these times  
That I've heard you say

Give me something to believe in  
Give me someone to believe in  
Give me something to believe in  
Give me someone to believe in

Lipgloss Lies, doin' the time  
Never gonna miss what I left behind  
If I get the chance I'll do it again  
I wouldn't change it, change it  
Change it, change it

Lipgloss Lies, doin' the time  
Never gonna miss what I left behind  
If I get the chance I'll do it again  
I wouldn't change it, change it  
Change it, change it
