Take a look at the confrontation  
view of the final destination  
take my life to the bottom line  
set my heart for detonation  
find the way to imagination  
travel through the soulway station  
karma the meditation

Take me down to the peaceful ground  
that peaceful ground I never found  
look at th etime that spins by me now

the ticking, taking time with a closer sound

Put out my life  
step out of my eyes, step out of my sight  
all splendid lies  
takes larger size by brand new disguise  
put out my life  
step out of my eyes, step out of my sight  
no rest is mine, no peace in mind  
cause I wear mankind
