If you,look at yourself

Realise,I'm not myself

How could you think that you

Are as good as you do

Could you really be

All that you say?

Or are you just like me?

Could you really be

All that you say

Or are you just like me?

I try to be myself

I'm not hurried like you

I told you how I felt

You sat down

Like you do

Could you really be

All that you say?

Or are you just like me?

Could you really be

All that you say

Or are you just like me?

Down,Down,Down

Could you really be

All that you say?

Or are you just like me?

Could you really be

All that you say

Or are you just like me?

I first met you and I

Was only a defect

Sorry,I'm not perfect

At least I know one thing

Could you really be

All that you say?

Or are you just like me?

Could you really be

All that you say

Or are you just like me
