No compromise for your control driven nature
Pu - shit on me cause you know you can't take it
Another bad lie
Another bad feeling
Love the feeling - when your feeling sour

Look in my eyes

You contradict yourself in every second sentence
It goes around like a radius circle
Another bad lie,
Another bad feeling
Love the feeling - when your feeling sour

Look in my eyes

Pretend
And its time that you knew
That I loved you
Could you try to pretend?
Speak no Lies

You always got your head down in the gutter
But you're try'n to live it down
So don't splutter
Prime the vein
Don't restrain
'Cause sharp broken steel can't hurt very much

Lift your head up cause you're better than that
Lift your head up cause you're better than that
Lift your head up cause you're better than that
Lift your head up..... No compromise

It's all good
It's all good from here

It's all good
It's all good
