I can feel her touch from far away  
The kind of woman that don't have to say  
Hey Boy, it's time Boy, it's you I want tonight.

Well I love her walk, and the way she moves  
She burns my blood, till I come unglued  
She's so tough, plays rough, smooth on the edge.

Find a way to make her mine  
Find a way to cross the line  
Take in my arms and make her believe  
Tell you girl I'll never let you leave

[Chorus:]

Lady Midnight come together, deep in the moonlight  
Lady Midnight come together, make love tonight.

She's a fantasy, a question mark  
No way to hold her beyond the dark  
Mystery, close to me, shadows of my heart.

Find a way beyond the dream  
Find a way to make her see  
Give her all I got and make her feel  
The passion deep inside is finally real,  
Oh yea!

When the candle burns beyond the night  
And I stand on my own  
And dream with morning sheds light  
That I am never alone, never let go...

[Chorus]
