Oh, in the dark where fear's the rule  
Where hell's bells ring aloud  
The dark red moon rising high  
Bloodshed everywhere

You gotta wake up to hear the call  
To feel the power flow through your blood  
Time to choose a path to stride  
Knowing that there is more than one

You swear to God that you'll be true  
To yourself and what you do  
Time to swallow all the pain  
Kill your pride and let it flow

The story of a thousand dreams  
Shown like on the TV screen  
The knowledge from a thousand years gone by  
Even the atrocities, the lies and instabilities  
All the lessons from the past help you survive

Chaos! I'm so confused  
Chaos! Everlasting  
Chaos! My spirit will not die  
I'm fighting for life  
Chaos! I'm so confused  
Chaos! Never ending  
Chaos! Our spirits will not die  
I'm fighting for love

Eyes are shut to the world  
Situation unimproved  
The cancer of darkness grows  
People tired and so confused

So many fallen souls lie about  
Helpless as the time flows by  
Find a light and cling to it  
Hold on tight or fall behind

The story of a thousand tears sung upon a melody

Feeling beauty touch your heart and soul  
Even pain and cruelties, the tests and the difficulties  
Have a meaning in the end  
Yes, you will survive

The story of a thousand dreams  
Shown like on the TV screen  
The knowledge from a thousand years gone by  
Even the atrocities, the lies and instabilities  
All the lessons from the past help you survive

Chaos! I'm so confused  
Chaos! Everlasting  
Chaos! My spirit will not die  
I'm fighting for life  
Chaos! I'm so confused  
Chaos! Never ending

Chaos! Our spirits will not die  
I'm fighting for love

I'm so confused - Everlasting  
My spirit won't die - I'm fighting for life  
I'm so confused - Everlasting  
Our spirits won't die - I'm fighting for love  
I'm so confused - Everlasting  
My spirit won't die - I'm fighting for life  
I'm so confused - Everlasting  
Our spirits won't die - I'm fighting for love
