CHORUS

Reach for the sky
And hold you're head up high
For tonight and every night you're a superstar
And don't u be afraid
Think of all the friends you've made
Like any other night youve got your name in lights
You're a superstar!

you're a superstar
you're a superstar

In a world that gives everything
dont u know that it dont mean a thing at all, at all
for a superstar
You've gotta find a rainbow
tell the world what everyone else knows
don't let them tell you to get a life
coz they know you're a superstar

chorus

If the thing you are today is what u wanna be
so don't be someone else when u be the best so easily
if u try if u need my baby you'll succeed
and you're eyes will make you see
you're a superstar x4

chorus
you're a superstar

and your eyes will make you see
you're a superstar
