I'll wipe these tears from your eyes
I'll wipe these tears, make you feel alright
And you can watch the world go around
So you woke up one morning
Found everything changed
So you woke up one morning
Found you had to rearrange your life
You know you can make it
If you don't love someone why fake it?
And if you love someone why chain them to you?
You know you'll never make it
So now you finally realize
Sometimes you just gotta let love pass you by
And watch the world go around
And it's alright
