Breath slow
Breath slow
It happened again now
But don't stare
Don't stare
You're fallin' in love now

And take your time
(You take your time you take your)

I'll get the melody for this one
You get the harmony and sing it at the top of your
lungs
And write from the heart. that's all I've got now
Praying to god that this one finds you out into the
crowd

Love.
It changed me
But I've been searching for a heart that will bring me to
my knees
