

Love History "Spiritual"

Fountain of knowledge springing up from the depths of ages.

The touches of the sun - stimulator of a spiritual power,
The godly paths still softly chained by blindness.

Yellow is the colour of the south, fading away beneath
the dark-blue night sky

And revealing to the enlightened few the first mystery
of the incomprehensible circle.

There are the traces of long forgotten steps in an
embrace of science and magic

Leading to the core of the most thrilling secrecy ever.
Secrecy of a life.

So long ago future has been born, the future we still
can not see.

What a chance to survive deep inside the globe!

Is there an answer to where the power of the Spirit has
gone?

Why has wisdom hidden among the veils of the
interstellar unknown?
