I see her walking away....my heart in her hands....
and i'll remember this day forevermore...

it's like the worst scene in a movie...and i keep playing
it over and over in my mind...and i can't rewind....or get
this right....

you're getting colder...oh i can feel it
girl i can see it...we're going nowhere...

i see her driving away my heart in the rearview
and the last thing on her mind is turning around
here's the ending of our movie...(and i'm still playing
this over and over in my mind)...still i can't find...the
reasons why.....

you're getting colder...oh i can feel it
girl i can see it...we're going nowhere...

she's driving nowhere faster now
...no i can't find a reason why!
"take your time...to figure this out"
as she takes her time... now we're falling out...
as i pick up the pieces just to fall apart again

we're going nowhere faster now
