(Verse 1)

I take my vitamins and wash 'em down with whiskey,  
And now I'm feelin', yeah, I'm feeling pretty tipsy.  
Sometimes I wonder if I'll make it to be 60  
But man I think it's, yeah, I think it's pretty risky,  
But I'll just worry 'bout it when the time has time  
'Cause right now all I wanna do is have some fun.  
You gotta make this life, make this life worth a livin'

(Chorus)

And now I could be wrong  
But then I'm mostly right.  
And we can go in circles  
Talkin' 'bout it every night.  
But when it all comes down  
I'd rather drink than drown.

'Cause we can't live our lives feelin' agitated.  
And we can't waste time gettin' all frustrated.  
'Cause a wise man said that  
Life is only what you make it.  
And a wise man said that  
If it's sellin' you should take it.  
'Cause we might burn out  
Or we'll all just fade away.

Or we'll all just fade away.

(Verse 2)

Sometimes it feels like life gets way to fuckin' busy,  
Like too much aloe makes you way to fuckin' dizzy.  
And when it feels like all this shit's just all for nothin',  
At least I know that bein' young it counts for somethin'.  
'Cause life's too short, you know you can't retort.  
In the end it's only and hospital wards.  
You gotta make this life, label hordes\* make this life  
worth a livin'

(Chorus)

And now I could be wrong  
But then I'm mostly right.  
And we can go in circles

Talkin' 'bout it every night.  
But when it all comes down  
I'd rather drink than drown.

'Cause we can't live our lives feelin' agitated.  
And we can't waste time gettin' all frustrated.  
'Cause a wise man said that  
You should never say never  
And a wise man said that  
Baby, no one lives forever  
'Cause we might burn out  
Or we'll all just fade away.

'Cause we might burn out  
Or we'll all just fade away.

Now I could be wrong  
But then I'm mostly right. x2

And now I could be wrong  
But then I'm mostly right.  
And we can go in circles  
Talkin' 'bout it every night. x2
