Remember I told you in life and death
We'd bury our secrets when they tear us apart
But love means going this far
Even when the ending is the start

If you dive into the ocean then I
Will be the wave around you tonight
And if you're sinking then oh it's alright
Cause I will be the ghost who is at your side

Remember your demons will surface and fight
But I will be a good phantom
And keep on romancing this cold little devil's tribe
And hold them away
While you are escaping into the light

So tell me where you've gone by now
I'm getting no reception on my heart radio
Now meet me where the angels collide
And I will be the ghost who is at your side

Now I'm changing, I am changing
Now I'm changing for you, now

When you dive into the ocean alive
Oh I will be the ghost at your side
And if you fall into the devil's tribe
Oh I will be the ghost at your side
And when anywhere the angels collide
Oh I will be the ghost at your side
Now dive into the blinding light.
