Nashville to New York
See Ohio and everything we can do
If we're apart
Desire has known us well
Living dreams is living hell but
They brought us through the times

I wanna light myself on fire
I spent thirty years not knowing you
I can't afford to waste more time
Running 'round the world
When all I know is... you're my girl

You're my cool shores and western stars
But where we live ain't who we are
When there's a mountain inside of you
And if I had an aeroplane
I'd fly 'round in the morning rain
Just to find your shooting star

Oh sweet love of mine, oh sweet love of mine

If I need you to carry my troubles
You do, love of mine
And if I need you to carry my worries
You do, love of mine
I need you to fix my hurting
Oh sweet love of mine
