"Stars"

Visit "[Stars](#)" on MotoLyrics.com

So if you see the stars tonight
Than tell me what they say
And let me know how bright they are
And I will always pray

So if you see the stars tonight
Than tell me what they say
And let me know how bright they are
And I will always pray

So if you see the stars tonight
Than tell me what they say
And let me know how bright they are
And I will always pray

That one day you'll come down to me
And tell me from above
My angel from the universe
The one I'll always love

So if you see the stars tonight
Than tell me what they say
And let me know how bright they are
And I will always pray

That one day you'll come down to me
And tell me from above
My angel from the universe
The one I'll always love
