"Never Be Afraid Again"

Visit "[Never Be Afraid Again](#)" on MotoLyrics.com

I won't breathe you now, I won't let you take me down
To your underworld, to your underworld,
I will follow thee, rising bubbles to the sky
Like a melody, like a melody...
I will never be alone, this could be my other home
Chorus:
I will never be afraid again, hold your breath then count
to ten
Stay for silence, stay for when I will never be afraid
again
No I'll never be afraid, close your eyes and count to ten
Stay for silence, stay for when I will never be afraid
again
It's a sudden change, from the surface to below
It's a different town, but you've got underground
You used to SOS, when you know you gonna drown
Try to stay alive, surrender to survive...
I will never be alone, this could be my other home
Chorus...
Bridge:
Find a light above the sea (oh no) , cross your heart
and follow me
Imagine how it all could end, imagine how it all could
be
Chorus...
