I see your eyes clear in my head
The eyes of the girl I barely met
Crystal blue, dream come true
In slow motion you just walk on by
Remembering now, remember how
You looked at me across the room that night
Were strangers still despite my will
You don't need her name with a smile so sweet
Your eyes cut deeper into me
Crystal blue dream come true
In slow motion, you just walk on by
Remembering now, remember how
You looked at me across the room that night
Were strangers still despite my will
Hell I wont be gone to long
Well im never coming back
Always hated saying so long
Well it always comes to that
Its just one smile, it's just one smile
Its all for you, it's all for you
I see you eyes clear in my head
The eyes of the girl I barely met
Crystal blue saw right through
In slow motion you just walked on by
