

## Lucio Battisti "Keep On Cruising"

Visit "[Keep On Cruising](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I've got a friend who's a genius  
He'll know exactly what to do  
He can make it all like new  
Given half a chance he'll do amazing things  
It's all described in manuals  
The logic's very sound  
He'll adjust what's wrong with you  
And make your motor pound  
And again you can get moving  
Though not exactly flying  
At least cruising.

Keep on cruising  
Keep it light keep it tight not confusing  
And don't listen to fears  
Or be blinded by tears  
Very softly very softly so soothing  
Now just keep right on cruising  
First with caution then acceleration  
With a pulsing beat a good vibration  
Pushing forward keep it sweetly moving

Now you know you are cruising  
And at night your light's illuminating  
Watch the signals and you'll know positively where  
you're going  
You can do it it's so easy  
You can do it let it go

I've got a friend who's a genius  
He'll know exactly exactly what to do  
He can make it all like new  
Giving you the right solution  
Substitution

Everything will come together  
And you know it's going to fit  
You'll be a better judge of people  
Those who stand from those who sit  
And again you can get moving  
Though not exactly flying  
At least cruising.

Keep on cruising  
Keep it light keep it tight not confusing  
And don't listen to fears  
Or be blinded by tears  
Very softly very softly so soothing  
Now just keep right on cruising  
First with caution then acceleration  
With a pulsing beat a good vibration  
Pushing forward keep it sweetly moving

Now you know you are cruising  
And at night your light's illuminating  
Watch the signals and you'll know positively where  
you're going  
You can do it it's so easy  
You can do it let it go

Now you know you are cruising  
Cruising
