the last thing on my mind
sleeping next to her
the last time we speak
i'm gonna make it hurt
i'm being brutally honest
but you're not even worth it
you say you love me
then you'll say you'd never lie

the last thing on my mind
sleeping next to her
the last time we speak
i'm gonna make this hurt
i'm being brutally honest
as if your not even worth it
you say you love me
then you'll say you'd never lie

if living well is the best revenge
then living well isn't good enough for me
i'm getting sick of your stories
i know your lies
you can't convince me you tell the truth
i told the truest things
i didn't tell you
i've got a secret that's too good for me to keep
you kept my pants at my ankles constantly
if not for that
i'd be gone within that first week

i'll collect every tear you cry
i'd make you wash away
you can drown in your salted sorrows
i hope you choke on every lie you said to me

i'll collect every tear you cry
i'd make you wash away
you can drown in your salted sorrows
i hope you choke on every lie you said to me

i kept your picture as a souvenir

i couldn't care less if you're ever here
i was using you
cause you're easy to work
so stop this song
cause this verse is gonna hurt

it's my revenge (listen carefully)
i'm brutally honest (listen again)
it's all for sex
and i was using you (what did you save me for)
i always knew you didn't tell the truth

i'll collect every tear you cry
i'd make you wash away
you can drown in your salted sorrows
i hope you choke on every lie you said to me

i'll collect every tear you cry
i'd make you wash away
you can drown in your salted sorrows
i hope you choke on every lie you said to me

i'm brutally honest
i'll make this this hurt
i'll make you bleed with my hands behind my back
it's now or never
you never loved me (its the three word heartless lie)

i'm brutally honest
i'll make this this hurt
i'll make you bleed with my hands behind my back
it's now or never
you never loved me (its the three word heartless lie)
(ill make it hurt)[repeat]
here's the truth
the things i didn't tell you
but i left them to be seen
all the years can you make your lies
before they get to me
[repeat]

the last thing on my mind
sleeping next to her
the last time we speak
i'm gonna make it hurt
i'm being brutally honest
but you're not even worth it
you say you love me
then you'll say you'd never lie

the last thing on my mind

sleeping next to her
the last time we speak
i'm gonna make it hurt
i'm being brutally honest
you didn't mean that much to me

the last thing on my mind
sleeping next to her
the last time we speak
i'm gonna make it hurt
i'm being brutally honest
but you're not even worth it
you say you love me
then you'll say you'd never lie

the last thing on my mind
sleeping next to her
the last time we speak
i'm gonna make it hurt
i see through every one of your lies
