I have gone right round the world, trying to find a  
women

A women that'll understand me

A women that'll understand me

All the women I had before, never understood me

Now that I've found you baby

I ain't gonna look no further

Now that I've found you baby

I ain't gonna look no further

Now that I've found you baby

I ain't gonna look no further

It's so nice when you're there, so nice, so nice

I love you I love you I love you I love you I love you

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

Baby you know how much I need you baby

Please never leave me baby, never leave me, ooh

You know baby my life depends on you

You are my future you are everything I've got

Please baby please baby, yeah

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright

I've got you babe to make me feel alright
