If I had one wish
I'd make us drift away far from this place
And you know better than me that I like it my way
Since the circumstance is weak,
I know that you are swallowing your pride
When you look at me

All I'm trying to say
Is that whatever you do it's okay
Baby I'll stay

I am not a fool
And it comes straight down to your p's and q's
And mister I think you have me all wrong
'Cause at the end of every day
I like to lay my head your way
And listen to your heart sing

All I'm trying to say
Is that whatever you do it's okay
'Cause baby I'll stay with you
I'll stay with you
