I'm not afraid of what people think tonight
You're beautiful
Looking at me, looking into your eyes
It's physical
Why must they make it mean anything more?
Boys looking on, you're turning me on
Spinning inside me and spinning inside me

Stars are shining bright for you and I, together
Free to close my eyes and fly away, forever
Lost in the lights
And it's you I want to find me
Over and over again
Don't let go

Don't be afraid of what people say tonight
It's all in fun
An innocent kiss, a feeling like this
It won't hurt anyone
Why must they make it mean anything more?
We can pretend tonight never ends
Spinning inside me and spinning inside me

Stars are shining bright for you and I, together
Free to close my eyes and fly away, forever
Lost in the lights
And it's you I want to find me
Over and over again
Don't let go

(Don't let go, together, don't let go, forever
Don't let go, together, don't let go, forever)

Stars are shining bright for you and I, together
Free to close my eyes and fly away, forever
Lost in the lights
And it's you I want to find me
Over and over again
Don't let go
